

Clinical and Translational Research Grand Rounds: " Clinical outcome trials: From idea to development "

Speaker: George L Bakris, MD

George L. Bakris, MD, is Professor of Medicine, Director of the Comprehensive Hypertension Center and member of the Committees on Clinical Pharmacology and Pharmacogenomics and on Molecular Metabolism and Nutrition at the University of Chicago. His contributions to clinical research and trials, along with their translation to practice, particularly in the areas of hypertension, diabetic kidney disease, and kidney disease progression are extraordinary. He has served as president of the American College of Clinical Pharmacology, the American Society of Hypertension, has advised the FDA and CMS, has shaped national guidelines for treatment of hypertension, diabetes, and chronic kidney disease and has published over 1000 peer-reviewed papers. Among many honors, he is the recipient of the 2019 Irvine Page-Alva Bradley Lifetime Achievement Award from the AHA Council on Hypertension. His grand rounds talk will describe how data from studies of individual agents affecting markers such as albuminuria and blood pressure were woven together to design an industry-supported cardiorenal outcome trial with practice-changing results.

Friday, Feb 2, 2024

Presentation: 12noon – 1pm

Research Grand Rounds are sponsored by the Georgetown-Howard Universities Center for Clinical and Translational Science (GHUCCTS) and its partner institutions (Georgetown and Howard Universities, MedStar Health Research Institute, the Washington DC VAMC, and Oak Ridge National Lab) to bring together our diverse clinical and research communities to share research that spans disciplines and stages of translation to improve individual and community health.
